FIG. 1 is a schematic diagram of a catheter system for aortic aneurysm treatment. The system includes a catheter (10) with a proximal handle (21) and a distal tip (12). The catheter is inserted into the aorta (50) and positioned within an aneurysm (52). A stent (54) is deployed from the catheter, covering the aneurysm neck (56). A guidewire (60) is shown passing through the catheter. Arrows indicate the direction of catheter movement and the deployment of the stent.
